CLINICAL FOCUS

Dr. Önder evaluates and manages patients with inflammatory bowel disease, including Crohn's disease and ulcerative colitis, as well as celiac disease and Barrett's esophagus. His practice also includes digestive symptoms and disorders such as reflux, gastritis and dyspepsia.

Diagnostic and therapeutic endoscopy is a central part of his work. He performs gastroscopy and colonoscopy, esophagoscopy, and ERCP for the assessment and treatment of biliary and pancreatic conditions. Which procedure is appropriate is decided after a review of the individual patient's history, prior findings and clinical examination.

Crohn's disease Ulcerative colitis Inflammatory bowel disease
Barrett's esophagus Celiac disease

CONDITIONS TREATED

Crohn's disease Ulcerative colitis Inflammatory bowel disease
Barrett's esophagus Celiac disease
