İstanbul

DEPARTMENT
Pathology Department

CLINICAL FOCUS

Dr. Tokat's practice is in medical pathology and diagnostic pathology. This involves the laboratory evaluation of tissue samples, such as biopsies and surgically removed specimens, and of cell samples, such as those obtained from body fluids or fine-needle aspirations.

Pathology reports are one part of the diagnostic picture. Their interpretation depends on the quality and representativeness of the sample and on the clinical context, and the final diagnosis and treatment decisions are made by the treating physicians together with the patient.
