Clinic, İstanbul

DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Ekinci's clinical work takes place within the Dental & Oral Health unit, where patients are assessed for their oral health concerns and a care plan is discussed in a structured consultation. The scope of the unit's work covers preventive care, including dental hygiene, as well as restorative treatment such as dental fillings, dental crowns and composite bonding.

Whether a particular treatment is suitable depends on the individual clinical situation, the condition of the teeth and gums, and the findings of a clinical examination. Dr. Ekinci places emphasis on explaining findings and options clearly so that patients understand what is proposed and why, before any decision about treatment is made.

INTERNATIONAL PATIENTS

Dr. Ekinci consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, for example dental X-rays, CT scans, previous treatment records and laboratory results, and arranges appointments and the clinic visit.
