CLINICAL FOCUS

Dr. Öz's areas of expertise include head and neck cancers and laryngeal cancer, for which he assesses patients and discusses the treatment options that apply to their situation. He also evaluates and manages dysphagia (swallowing difficulty) and voice hoarseness, which are closely connected to his work in laryngology.

In nasal and sinus disease he treats sinusitis and performs septoplasty and septorhinoplasty. He also manages snoring, adenoid conditions and tonsil disease, including tonsillectomy. Whether a procedure is appropriate depends on the individual findings and is decided after clinical examination.
