CLINICAL FOCUS

The areas of clinical interest of Feyza Ağaç Çelebi cover a range of mood and anxiety conditions. These include depression, bipolar disorder and panic disorder, as well as obsessive-compulsive disorder (OCD) and illness anxiety disorder, also known as hypochondriasis.

Sleep disorders form another part of her clinical focus, including insomnia, sleep apnea and circadian rhythm disturbances, with melatonin-related approaches considered where appropriate within the wider care team. In addition, she sees individuals and couples dealing with relationship problems and marital problems. Neuropsychological assessment is also part of her practice;

Bipolar Disorder

Post-Traumatic Stress Disorder

Sleep Disorders

Panic Disorder

Relationship Problems

INTERNATIONAL PATIENTS

Feyza Ağaç Çelebi sees international patients in İstanbul. Before the visit, the Acibadem international patient team coordinates the collection of prior reports, including previous psychological or psychiatric evaluations, discharge summaries, laboratory results and any relevant imaging reports, and arranges appointments as well as the hospital visit itself.
