CLINICAL FOCUS

A large part of Dr. Akin's work involves common inflammatory and chronic skin conditions. She evaluates and treats acne, psoriasis and eczema (atopic dermatitis), conditions that often require ongoing follow-up and adjustment of treatment over time.

In addition to medical management, Dr. Akin offers procedural treatments where they are clinically indicated. These include cryotherapy, a technique that uses controlled cold to treat certain skin lesions, and platelet-rich plasma (PRP), which she uses in selected cases.
