CLINICAL FOCUS

Dr. Acar evaluates and treats a broad range of heart conditions. His areas of expertise include arrhythmias and atrial fibrillation, in which the heart beats irregularly or too fast, as well as coronary artery disease, in which narrowing of the vessels supplying the heart may cause chest discomfort or reduced blood flow to the heart...

Structural and blood pressure concerns form another part of his practice. Dr. Acar assesses heart valve diseases and cardiac murmurs, which are sounds detected during examination that may point to a valve or flow abnormality and often require further evaluation.
