DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Menopause is the central area of Dr. Topuz's clinical work. She evaluates women in the perimenopausal and postmenopausal periods and discusses the options that may be appropriate for their symptoms and overall health. Her gynecological practice also includes HPV, endometriosis and polycystic ovary syndrome, conditions that are usually assessed through the patient's history, a clinical examination and a review of any existing...

In the surgical and procedural part of her practice, Dr. Topuz sees patients with uterine prolapse and performs hysterectomy where this is considered an appropriate option after evaluation. Vaginal tightening is also among the procedures she offers. On the obstetric side, her areas of expertise include epidural birth and cesarean delivery.

Epidural birth

Hysterectomy

INTERNATIONAL PATIENTS

Dr. Topuz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
