CLINICAL FOCUS

A large part of Dr. Tubaş's practice is devoted to the care of newborns and young infants. This includes newborn follow-up, newborn screening tests, and the treatment of neonatal jaundice. She also sees families whose babies present with infant colic, and she provides guidance on feeding and settling during the early months.

Dr. Tubaş evaluates and monitors growth retardation and short stature, developmental disorders in children, and childhood nutritional disorders, and she offers weight management for children and adolescents.

Infant colic

Child and adolescent health

Iron deficiency and anemia in children

Upper respiratory tract infections in children

Monitoring childhood nutritional disorders

CONDITIONS TREATED

Infant colic

Upper respiratory tract infections in children

Iron deficiency and anemia in children

Monitoring childhood nutritional disorders

Growth retardation and short stature
