DEPARTMENT

Physical Medicine &amp; Rehabilitation

## CLINICAL FOCUS

Ms Özdemir's work centers on physical therapy for patients who need support with movement, function, and pain. Mobility rehabilitation is one of her listed areas: this involves working with patients whose ability to move, walk, or perform everyday activities has been affected, with the aim of restoring or maintaining function as far as the underlying condition allows.

Individualized rehabilitation planning is also among her areas of expertise. In practice, this means that a rehabilitation program is developed around the individual patient's condition, current level of function, and personal goals, rather than following a single fixed protocol.

Mobility rehabilitation

Pain reduction therapy

Individualized rehabilitation planning

## INTERNATIONAL PATIENTS

Ms Özdemir speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. For international patients, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes, and discharge summaries, and arranges appointments and...
