DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

In gynecology, Dr. Özeren evaluates and treats women with endometriosis and endometrioma, and her subspecialty work is centered on this condition. She also sees patients with gynecological cancers, including ovarian cancer and cervical cancer, as well as HPV-related conditions.

In obstetrics, she follows women through pregnancy and offers detailed pregnancy ultrasound. Pregnancy monitoring is planned according to the stage of pregnancy and any identified risk factors. She monitors and manages pregnancy-related conditions such as gestational diabetes and preeclampsia, and she discusses childbirth options with expectant mothers, including epidural delivery.

INTERNATIONAL PATIENTS

Dr. Özeren consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
