CLINICAL FOCUS

Dr. Kaplan's clinical work covers both gynecology and obstetrics. In gynecology, she sees women with menstrual pain and menstrual irregularities, as well as concerns related to menopause. A particular area of interest is urinary incontinence and bladder health, where assessment focuses on the type and pattern of symptoms before treatment options are discussed.

In obstetrics, Dr. Kaplan offers pregnancy follow-up, monitoring the health of mother and baby over the course of the pregnancy and discussing plans for delivery. She attends childbirth, including cesarean delivery when this is indicated, and also supports water birth for women for whom this approach is considered appropriate.

Menopause Urinary Incontinence Bladder Health
Sexual Dysfunction Treatment Menstrual Pain

INTERNATIONAL PATIENTS

Dr. Kaplan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit.
