Summer foot care · Callus care

HOSPITAL
Acibadem Altunizade Hospital, İstanbul

DEPARTMENT
Podiatry & Foot Health

CLINICAL FOCUS

Gizem Sencer's areas of expertise include diabetic foot care, medical foot care and the care of patients with flatfoot (pes planus). Diabetic foot care is directed at patients with diabetes, in whom regular attention to the skin and nails of the feet forms part of ongoing care.

She also provides callus care, cracked heel care, care for deformed nails and care for thickened nails, addressing common skin and nail changes that can cause discomfort or interfere with daily activity. Her expertise extends to foot care during pregnancy, a period in which the feet may require adapted care, and to summer foot care, which concerns the particular needs of the feet in warm weather and with open footwear.

INTERNATIONAL PATIENTS

Gizem Sencer consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, for example X-ray, MRI, CT or ultrasound reports, laboratory results and discharge summaries, arranges appointments and organises the hospital visit.
