CLINICAL FOCUS

A significant part of Dr. Gökkaya's practice is urogynecology, the area of gynecology that deals with bladder health and pelvic floor problems. She assesses and treats urinary incontinence and related bladder complaints, which are usually evaluated through a detailed history and clinical examination before conservative, medical or surgical options are discussed.

In obstetrics, Dr. Gökkaya provides pregnancy follow-up and delivery care, accompanying patients through the course of pregnancy and planning for birth. Her surgical and procedural interests include vNOTES scarless surgery, an approach performed through vaginal laparoscopy that avoids abdominal incisions, as well as genital aesthetic procedures such as vaginal tightening and vaginal whitening.

Genital aesthetic procedures

Vaginal whitening

Vaginal tightening

Sexually transmitted diseases

Menstrual irregularities

INTERNATIONAL PATIENTS

Dr. Gökkaya consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For patients traveling from abroad, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit.
