CLINICAL FOCUS

Dr. Pekel's field is ophthalmology, the branch of medicine concerned with the eye and its disorders. His specialist training at Istanbul Prof. Dr. N. Reşat Belger Beyoğlu Eye Training and Research Hospital, a dedicated eye training and research institution, and his subsequent years at Pamukkale University Faculty of Medicine form the basis of his ophthalmic practice.

Whether a particular eye condition or procedure falls within Dr. Pekel's practice is clarified during the review of a patient's case. Each situation is assessed on its own merits, and any recommendation depends on the findings of the examination and the information provided in earlier reports.

INTERNATIONAL PATIENTS

Dr. Pekel speaks Turkish and English, and interpreters can be arranged for patients who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital stay.

CONDITIONS TREATED

Eye trauma

Diabetic macular edema

Central retinal vein occlusion

Glaucoma
