Gynecology & Obstetrics

CLINICAL FOCUS

In gynecologic oncology, Dr. Tosun evaluates and treats women with ovarian cancer and cervical cancer. He also manages HPV and HPV-related conditions, including genital wart treatment. His surgical practice includes hysterectomy and vNOTES scarless surgery, a minimally invasive approach in which laparoscopic surgery is performed through the vagina rather than through abdominal incisions.

In obstetrics, Dr. Tosun provides pregnancy follow-up and delivery, including detailed pregnancy ultrasound. He follows pregnancies complicated by gestational diabetes and monitors women at risk of or diagnosed with preeclampsia. Delivery options are discussed with each patient in light of her clinical situation and the course of the pregnancy.

INTERNATIONAL PATIENTS

Dr. Tosun consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes, and discharge summaries, arranges appointments, and organizes the...
