CLINICAL FOCUS

Dr. Saraç's clinical work covers both inflammatory and immune-mediated skin diseases and common dermatological complaints. In the first group, she assesses and follows patients with Behçet's disease, dermatomyositis and bullous pemphigoid, conditions in which skin findings may form part of a wider medical picture and in which management...

A further part of her practice concerns excessive sweating, including botulinum toxin treatment for excessive sweating in suitable patients after clinical assessment. She manages skin infections, among them athlete's foot and Candida fungal infection, and addresses strawberry legs.
