DEPARTMENT
Pulmonology

CLINICAL FOCUS

Dr. Dabak evaluates and manages a range of respiratory conditions. Her areas of expertise include lung nodules, lung cancer and other thoracic cancers, and she performs bronchoscopy as part of the diagnostic work-up of pulmonary lesions. She also treats chronic obstructive pulmonary disease (COPD), asthma and pulmonary embolism.

Lower respiratory tract infections are a further part of her practice, including bronchitis and pneumonia. In addition, Dr. Dabak provides support for patients who wish to stop smoking. The appropriate diagnostic steps and treatment options depend on each patient's condition and are discussed individually after clinical assessment.

Lung nodules Lung cancer Thoracic cancers Bronchoscopy

Chronic obstructive pulmonary disease (COPD)

CONDITIONS TREATED

Lung nodules Lung cancer Thoracic cancers
