Acibadem Maslak Hospital, İstanbul

DEPARTMENT  
Pulmonology

## CLINICAL FOCUS

Dr. Özkan evaluates and treats a range of lung diseases. Her clinical work covers lower respiratory tract infections, including bronchitis and pneumonia, as well as chronic airway conditions such as asthma and chronic obstructive pulmonary disease (COPD). She also assesses patients with pulmonary embolism and other pulmonary diseases.

A further part of her practice concerns lung nodules, lung cancer and other thoracic cancers. In the diagnostic work-up of these conditions she performs bronchoscopy and EBUS (endobronchial ultrasound), which may be used to obtain samples from the airways and adjacent lymph nodes when this is clinically indicated.

Lower respiratory tract infections

Bronchitis

Pneumonia

Lung cancer
