CLINICAL FOCUS

Dr. Cancan's work centers on the evaluation and surgical management of general surgical conditions. In a general surgery practice, this typically begins with a careful review of the patient's history, symptoms and any imaging or laboratory results already obtained, followed by a clinical examination.

General surgery as a discipline covers a range of conditions of the abdomen and related organs. Patients who are seeking information about the types of problems commonly addressed within this field may find it helpful to read the pages on gallbladder surgery, gallstones, cholecystitis, appendicitis, hiatal hernia, diverticulitis, hemorrhoids, fecal incontinence and thyroid disease, as well as the general overview of minimally...

INTERNATIONAL PATIENTS

Dr. Cancan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before the visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges the appointment and the...
