CLINICAL FOCUS

Dr. Atilla's diagnostic work spans the main imaging techniques used in a hospital radiology department. She reports mammography, CT imaging and magnetic resonance imaging, and performs and interprets ultrasound imaging, including Doppler ultrasound, abdominal ultrasound and thoracic ultrasound. Her work also includes conventional X-ray imaging and fluoroscopy.

In addition to diagnostic imaging, Dr. Atilla works in interventional neuroradiology, an area of radiology that uses image guidance for minimally invasive procedures involving the vessels and structures of the brain, head and neck, and spine.

Head and neck imaging

Doppler ultrasound

INTERNATIONAL PATIENTS

Dr. Atilla speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
