DEPARTMENT
Physical Medicine & Rehabilitation

CLINICAL FOCUS

Gülşah Kalaycı's clinical focus is physiotherapy for patients whose movement, strength or day-to-day function has been affected by injury, illness, surgery or a chronic condition. Rehabilitation in this setting is typically planned together with the treating physicians of the unit, and the physiotherapist's role is to assess the patient's current physical status, define realistic goals and carry out the exercise-based and...

Mobility rehabilitation addresses walking, balance, transfers and joint range of motion, while functional rehabilitation aims at the practical tasks a patient needs to perform at home, at work or in daily life. Because needs differ considerably from one person to another, Gülşah Kalaycı prepares individualized rehabilitation care plans that take into account the diagnosis, the stage of recovery, any surgical or medical...

INTERNATIONAL PATIENTS

Gülşah Kalaycı works in Turkish and English, and interpreters can be arranged for patients who speak other languages. The hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
