CLINICAL FOCUS

Dr. Kutlu's clinical practice covers the health of children from the newborn period through adolescence. In newborns, this includes newborn follow-up, newborn screening tests, and newborn jaundice treatment.

A significant part of her work concerns nutritional and hematological conditions in childhood. She evaluates and manages iron deficiency and childhood anemia, as well as rickets. Assessment in these areas generally relies on the child's history, a clinical examination, and a review of relevant laboratory results, with management planned...
