CLINICAL FOCUS

Dr. Özdi's clinical work concentrates on ultrasonographic imaging and mammography, with a particular interest in breast diseases. Ultrasonographic imaging uses sound waves to visualize soft tissues and is commonly used to assess findings identified during clinical examination or on other imaging.

In the context of breast diseases, imaging findings are interpreted alongside the patient's history, symptoms and any previous examinations. Imaging alone does not establish a diagnosis in every case; depending on the findings, the referring physician may recommend further evaluation. Dr.

INTERNATIONAL PATIENTS

Dr. Özdi consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, mammography, MRI or CT reports, laboratory and pathology results, operative notes and...
