CLINICAL FOCUS

Dr. Aslan's areas of expertise include rheumatoid arthritis, ankylosing spondylitis and psoriatic arthritis, conditions in which persistent joint or spinal inflammation can lead to pain, stiffness and reduced mobility if not identified and treated.

Diagnostic assessment forms an important part of Dr. Aslan's work. He performs detailed joint examination and assessment to document which joints are involved and to what degree, and he interprets autoantibody tests, laboratory results that can help distinguish between different rheumatic and autoimmune conditions.

Rheumatoid arthritis

Ankylosing spondylitis

Psoriatic arthritis

Systemic lupus erythematosus

Gout

INTERNATIONAL PATIENTS

International patients seeking an opinion from Dr. Aslan are supported by the Acibadem international patient team, which coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the hospital visit.

CONDITIONS TREATED

Rheumatoid arthritis
