CLINICAL FOCUS

Dr. Çakır's clinical work centers on prostate disease diagnosis and treatment, including benign prostatic hyperplasia. His training in this area includes the UroLift prostate lift procedure, the Rezūm procedure and laser enucleation.

Other areas of his practice include testicular cancer and kidney stones. For stone disease, his course training and research cover flexible ureterorenoscopy and retrograde intrarenal surgery. The suitability of any given approach depends on the individual patient's findings and is determined after a clinical assessment.
