CLINICAL FOCUS

A large part of Dr. Karagözoğlu's work involves dental implants. Where the jawbone is not sufficient to hold an implant, he performs sinus lifting and bone grafting to build up the supporting bone before or at the time of implant placement. For patients who have lost most or all of their teeth in one jaw, he offers All-on-Four and All-on-Six treatment, in which a full arch of fixed teeth is supported on four or six implants.

His surgical practice also covers impacted tooth extraction, routine tooth extraction and cyst surgery in the jaws. In addition, he treats teeth clenching using approaches such as Botox injections and custom night guards, chosen according to the patient's symptoms and clinical findings. In many cases, extraction, implant-related care and clenching treatment are considered together as part of a single overall plan.

INTERNATIONAL PATIENTS

Dr. Karagözoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT scans, previous treatment records and laboratory results, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Night guards
