CLINICAL FOCUS

Dr. Göksel evaluates and treats disorders of the brain, spine, spinal cord and nervous system in adults and children. His areas of expertise include brain tumors, including deep-seated brain tumors, brain aneurysms, brain hemorrhage and arachnoid cysts. In the field of movement disorders and spasticity, he performs deep brain stimulation, baclofen pump implantation and epidural nerve stimulation.

His spinal practice covers back, neck and spinal pain, disc herniation and spinal hypolordosis. In pediatric neurosurgery, he assesses and treats conditions such as tethered cord syndrome. He also focuses on the treatment of pituitary diseases.

Arachnoid cysts

Baclofen pump implantation

Back, neck and spinal pain and disc herniation

Spinal hypolordosis

Brain aneurysms

INTERNATIONAL PATIENTS

Dr. Göksel speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
