Orthopedics & Joint Center

CLINICAL FOCUS

A significant part of Dr. Özbay's practice is orthopedic oncology. He evaluates and treats bone tumors and soft tissue sarcomas, as well as bone cysts in children. Surgery for tumors in the arms and legs frequently overlaps with reconstruction, and advanced limb reconstruction is one of his subspecialties.

Dr. Özbay also manages trauma and a broad range of joint diseases, including osteoarthritis. Assessment of a painful or stiff joint typically begins with a clinical examination and a review of imaging, followed by a discussion of the non-surgical and surgical options that may be appropriate. Wound care is a further area of expertise;

INTERNATIONAL PATIENTS

Dr. Özbay consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging — for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries — and arranges appointments and...
