CLINICAL FOCUS

A central part of Dr. Yavuzer's practice is the assessment and management of thyroid disorders. Patients with suspected or known thyroid disease are evaluated through history, clinical examination and review of existing laboratory and imaging results, with treatment planned according to the individual findings.

His work in geriatrics addresses the health concerns of older adults, in whom several chronic conditions may coexist and require coordinated follow-up. Dr. Yavuzer also evaluates pancreatic diseases, liver diseases, including fatty liver disease, and diseases of the biliary tract.
