CLINICAL FOCUS

Thyroid disorders form a central part of Dr. Mumcuoğlu's practice. He evaluates and manages patients with thyroid diseases, drawing on laboratory findings, imaging reports and clinical examination to establish a diagnosis and to plan and monitor treatment.

Dr. Mumcuoğlu also assesses and treats patients with anaemia and obesity, and his areas of interest extend to longevity applications, wellness, and poisoning. Because several of these conditions can occur together, for example obesity, prediabetes and thyroid dysfunction, an internal medicine assessment may address more than one concern in the same visit.

Wellness

INTERNATIONAL PATIENTS

Dr. Mumcuoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, ultrasound, MRI or CT reports, operative notes and discharge...
