DEPARTMENT
Organ Transplantation

CLINICAL FOCUS

A central part of Dr. Karakayali's work is organ transplantation, including kidney transplantation and liver transplantation. He also evaluates and treats a range of liver and biliary tract diseases, among them fatty liver disease, liver failure and liver cancer, as well as pancreatic diseases.

His hepatopancreatobiliary practice further includes gallbladder inflammation (cholecystitis) and cancers of the gallbladder and bile ducts. In addition, he performs thyroid and other endocrine surgery and treats hemorrhoids and anorectal conditions.
