CLINICAL FOCUS

Dr. Zadeh's clinical work covers several of the most common cardiovascular conditions. He evaluates and manages coronary artery disease, in which narrowing of the arteries supplying the heart can cause chest symptoms or reduced blood flow, and he performs angiography as part of the diagnostic work-up when it is clinically indicated.

His interests further include heart failure, where the heart does not pump as effectively as it should, and heart valve diseases, in which one or more valves do not open or close properly. He assesses heart murmurs, which may be harmless or may point to an underlying valve or structural problem, and he cares for patients with...
