DEPARTMENT
Anesthesiology & Reanimation

CLINICAL FOCUS

The core of Dr. Güneyli's work is anesthesia and anesthesia planning. Before a procedure, he reviews the patient's medical history, current medications and any previous experiences with anesthesia in order to select an approach that is appropriate for the individual patient and the planned intervention.

His practice also covers perioperative care, meaning the medical support a patient receives before, during and after an operation or intervention. This includes monitoring during the procedure, management of pain and other symptoms in the early recovery phase, and coordination with the treating surgical or medical team. In addition, Dr.
