(Izmir)

DEPARTMENT
Dermatology

CLINICAL FOCUS

Dr. Demirdağ evaluates and treats a range of inflammatory and infectious skin conditions. These include acne, atopic dermatitis, contact dermatitis and seborrheic dermatitis, as well as other forms of eczema and skin infections.

A further area of her work is the assessment of pigmented lesions and skin tumours. Building on her training in dermatoscopy, she examines suspicious lesions and is involved in the diagnosis and management of skin cancer, including melanoma and other skin tumours.

Hair loss treatment, including during pregnancy

Fractional laser treatment

Skin infections

PRP (platelet-rich plasma) applications

Excessive sweating treatment

INTERNATIONAL PATIENTS

Dr. Demirdağ consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, including laboratory and pathology results, operative notes, discharge summaries and any relevant imaging, and arranges...
