CLINICAL FOCUS

Dr. Şahin treats a broad range of dental and oral health conditions. Her areas of expertise include the treatment of dental caries, root canal therapy for teeth with infected or damaged pulp, and tooth extraction where a tooth cannot be preserved.

In restorative and reconstructive dentistry, Dr. Şahin performs dental implant placement and prosthetic dental restoration for patients who have lost one or more teeth or who require replacement of damaged tooth structure. She also provides orthodontic treatment for the correction of tooth alignment and bite problems.

Dental caries treatment

Tooth extraction

Periodontal disease treatment

Dental implant placement

INTERNATIONAL PATIENTS

Patients traveling from abroad are supported by the Acibadem international patient team, which coordinates the collection of prior reports and imaging, such as dental or panoramic X-rays, CT scans, laboratory results, previous treatment notes and discharge summaries, before the visit. The team also arranges appointments and organizes the hospital stay. A first consultation with Dr.
