CLINICAL FOCUS

In medical dermatology, Dr. Subaşı assesses and treats acne, rosacea and pigmentation disorders, including vitiligo and birthmarks. She also evaluates patients with hair loss and provides treatment for excessive sweating.

Her cosmetic dermatology work includes skin rejuvenation, platelet-rich plasma (PRP) applications, microneedling and botulinum toxin treatment. She also performs tattoo removal. For cosmetic procedures, the consultation typically includes a discussion of what the treatment involves, the expected course of recovery and the limitations of each option, so that patients can make...

INTERNATIONAL PATIENTS

Dr. Subaşı consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports, photographs and any previous treatment records, arranges appointments and organises the hospital visit in Eskişehir.
