CLINICAL FOCUS

Dr. Gölalan's clinical practice covers orthodontic assessment and orthodontic treatment planning. An assessment typically involves examining the position of the teeth, how the upper and lower teeth meet, and the relationship between the jaws, alongside any dental imaging that is available.

Her areas of expertise also include dental alignment and jaw alignment. Treatment planning is individualized, taking into account the patient's age, dental development, existing dental work and personal priorities. Dr. Gölalan discusses the possible approaches, the expected duration of care and the practical considerations that may be relevant for a patient who travels for treatment, so that decisions can be made with a...

INTERNATIONAL PATIENTS

Dr. Gölalan speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as X-ray and other radiology reports, laboratory results and records of previous dental treatments, and arranges appointments and the hospital visit.
