Surgery

CLINICAL FOCUS

A central part of Dr. Dizen's practice is endocrine surgery, including the assessment and treatment of thyroid diseases. He also performs obesity surgery and evaluates patients living with obesity who are considering a surgical option; further general information is available on the obesity treatment page.

Dr. Dizen additionally treats pancreatic, liver and biliary tract diseases, with clinical interest in conditions such as fatty liver disease and liver failure; see the liver disease treatment page for background.

Endocrine surgery Haemorrhoid and anorectal disease treatment
Obesity surgery Obesity Pancreatic, liver and biliary tract diseases

CONDITIONS TREATED
