CLINICAL FOCUS

The liver is a central part of Dr. Aktaş's practice. He assesses and treats patients with liver diseases, including fatty liver disease, cirrhosis and liver failure. In these conditions, surgical evaluation is one part of a broader assessment, and the appropriate approach depends on the stage of the disease, the patient's overall...

Dr. Aktaş also sees patients with liver cancer, pancreatic diseases and biliary tract diseases. Because these conditions often present with overlapping symptoms and may involve more than one organ system, his assessment typically brings together the clinical history, imaging and pathology results before any treatment plan is discussed.
