DEPARTMENT
Breast Health Department

CLINICAL FOCUS

Dr. Ünal's practice addresses three common reasons patients seek a breast specialist. Breast cysts are changes in breast tissue that are often identified on examination or imaging; her role includes evaluating such findings, discussing what they may mean for the individual patient and advising on whether follow-up or further assessment is appropriate.

Breast pain is another frequent concern that brings patients to the clinic. Dr. Ünal assesses the nature, location and pattern of the pain, considers possible contributing factors and, where needed, recommends further evaluation.

INTERNATIONAL PATIENTS

Dr. Ünal consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit.
