İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

In perinatology, Dr. Dede follows women through pregnancy monitoring and delivery planning, with particular attention to high-risk pregnancies. Her assessment relies on detailed ultrasound in pregnancy, and where indicated she performs amniocentesis.

In general gynecology, she treats endometriosis and evaluates women with infertility. Her urogynecological work includes urinary incontinence, bladder health and diseases, and pelvic organ prolapse. She also manages HPV and other sexually transmitted infections.
