CLINICAL FOCUS

A significant part of Dr. Deveci's work involves conditions that affect vision in adults. She sees patients with myopia and with cataract, and her practice includes smart lens applications, in which an intraocular lens is considered as part of the treatment plan. She also evaluates and manages retinal diseases, including macular degeneration.

Dr. Deveci also treats paediatric eye conditions. These include strabismus, in which the eyes are not aligned, and amblyopia, sometimes referred to as lazy eye. She additionally assesses eyelid drooping in patients of different ages. Because children's visual development and adult eye conditions require different approaches, her assessment takes into account the age of the patient, the history and the clinical findings before...

INTERNATIONAL PATIENTS

Dr. Deveci speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as previous eye examination records, laboratory results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
