FOCUS
Treatment of Hemorrhoids and Anorectal...

HOSPITAL
Acibadem Fulya Hospital, İstanbul

DEPARTMENT
Gastroenterology

CLINICAL FOCUS

A central part of Dr. Hamzaoğlu's practice is inflammatory bowel disease, including the treatment of Crohn's disease and ulcerative colitis. Management of these chronic conditions usually involves confirming the diagnosis, assessing disease activity and extent, and planning medical therapy and follow-up over time.

Diagnostic and therapeutic endoscopy is part of her routine work, including gastroscopy, colonoscopy and esophagoscopy, which may be used to investigate symptoms, obtain tissue samples or monitor known disease. In addition, she treats hemorrhoids and other anorectal diseases.
