CLINICAL FOCUS

A substantial part of Dr. Bayram's work concerns the foot and ankle. He treats clubfoot, flatfoot, and diabetic and Charcot foot conditions, and performs deformity surgery and other forms of foot surgery when conservative measures are not sufficient.

Dr. Bayram also sees adult patients with joint osteoarthritis and with conditions of the shoulder and elbow. Within orthopedic oncology, he evaluates and treats bone tumors. Depending on the diagnosis, care may include guidance on conservative treatment, monitoring, or surgical options when these are clinically appropriate.

Foot and Ankle Surgery

Clubfoot

Pediatric Hand and Upper-Extremity Surgery

Pediatric Orthopedics

Bone Cysts in Children

INTERNATIONAL PATIENTS

Dr. Bayram consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes, and...
