CLINICAL FOCUS

Dr. Çelik's clinical work centers on kidney disease and its long-term management. His listed areas of expertise include chronic kidney disease, acute kidney injury and renal failure. He is involved in dialysis management for patients whose kidney function has declined to the point where renal replacement therapy is being considered or is...

A particular area of his experience is peritoneal dialysis, including continuous ambulatory peritoneal dialysis (CAPD). His published research addresses the assessment of malnutrition-inflammation syndrome in peritoneal dialysis patients and the relationship between peritoneal transport status, atherosclerosis and inflammation in CAPD...
