Hospital, İstanbul

DEPARTMENT
Radiology

CLINICAL FOCUS

Dr. Ercan's work covers a range of diagnostic imaging methods. His areas of expertise include ultrasound, in particular abdominal ultrasound, thoracic ultrasound and Doppler ultrasound, as well as ultrasonographic imaging more broadly.

A further part of his practice relates to breast diseases, where he performs and interprets mammography. In each of these areas, the role of the radiologist is to acquire and evaluate images and to provide a report that supports the referring physician in reaching a diagnosis and planning further care.

INTERNATIONAL PATIENTS

Dr. Ercan speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
