Acibadem Maslak Hospital, İstanbul

DEPARTMENT
Neurosurgery

CLINICAL FOCUS

Dr. Kertmen assesses and treats structural conditions of the brain, including brain aneurysms, brain tumours, pituitary disorders and hydrocephalus. For pituitary disease and lesions of the skull base, he performs endoscopic pituitary and skull base surgery. His practice also includes neuroendoscopy and stereotactic biopsy, in which a tissue sample is obtained from a precisely defined location to establish a diagnosis.

A second area of focus is functional neurosurgery and neuromodulation. Dr. Kertmen treats movement disorders, including Parkinson's disease, essential tremor and dystonic tremor, and offers deep brain stimulation for suitably selected patients.

Brain aneurysms Deep brain stimulation Brain tumours
Epidural nerve stimulation Epilepsy surgery

INTERNATIONAL PATIENTS

Dr. Kertmen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Brain aneurysms Brain tumours Movement disorder treatment
Hydrocephalus Pituitary tumor
