DEPARTMENT
Radiology

CLINICAL FOCUS

Dr. Soydan's work is concentrated on two closely related areas: diagnostic imaging and radiologic assessment. In practice this means interpreting imaging studies and preparing structured reports that describe what the images show, how the findings relate to the clinical question posed by the treating physician and, where appropriate, whether further imaging or follow-up may be useful.

For patients who have already undergone imaging elsewhere, radiologic assessment may also involve reviewing prior studies alongside new examinations, so that changes over time can be described. General background on specific imaging examinations offered within the hospital's diagnostic services, such as coronary CT angiography and PET-CT imaging, is available on this site.

Diagnostic imaging

Radiologic assessment

INTERNATIONAL PATIENTS

Dr. Soydan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
