CLINICAL FOCUS

Dr. Ceylan's areas of expertise include burn treatment, trauma and toxicology. In burn care, the emergency evaluation typically addresses the extent and depth of the injury, pain control and the early steps of wound management. In trauma, the focus is on rapid assessment of injuries, identification of conditions that need urgent attention and initiation of appropriate treatment.

He also manages a range of environmental and respiratory emergencies. These include drowning and acute hypoxia, in which oxygen delivery to the body is compromised and requires prompt evaluation, as well as airway obstruction, where securing the airway is a priority.

INTERNATIONAL PATIENTS

Dr. Ceylan communicates with patients in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
